

Keith Voisey

Although I should be retired, I volunteer my time and expertise as MLRO (Money Laundering Reporting Officer) for our practice. I am a partner and Director here. It is quite different from what I have accomplished in the past, however, the experience I gained in other sectors has proven to be a valuable asset in the administration of the business. Over the years, I had many roles, mainly in marketing and specialised engineering. For instance, I set up the now known network of PC Mobility. Creating processes and organisational functionality is a great interest of mine. I have written several user and procedure manuals, some of them still in use today. I built my first car 'King Pin 1' when I was 19. This car is still going today, celebrating nearly 50 years of road worthiness! I used to be in dragsters races, looking after 22JR and working with Tony Nancy, Bob Keith, Danny Ongias and Merek Chertkow. Today when I am not in the office, I enjoy building and collecting model ships, writing novels, listening to classical music (Vaughan Williams in particular) and abiding to my lovely wife's wishes (and her cats, of course). Like my wife Laure, I am also involved in worldwide charity work, teaching and caring for others.
